

New Gate of the Ignatian welcome at Manresa

Ignatian pilgrims can discover a new Ignatian Manresa Space that has been recovered in a part of the cloister of the convent of Santo Domingo where St. Ignatius lived and spent many hours of personal conflict, in their search for truth and peace. It has at the entrance a beautiful sculpture of a door that opens to those who seek the truth with the humility that characterized Ignacio. With its joined hands and bowl for food, this sculpture is a symbol of fraternal welcome to the pilgrims upon their arrival in the Ignatian city.
